

HOSPITALITY & LEISURE LIGHTING

DOUBLETREE BY HILTON HOTEL

WEST END & VICTORIA, LONDON

GAMMA
ILLUMINATION

PROJECT OVERVIEW

- The lounge and bar area in the West End hotel was fitted with adjustable Syncro FE LED display lights fitted with a 3000K colour temperature, and a sleek piano black finish to create a stylish and cosy feel
- Its dimming capabilities enabled the hotel to select light levels depending on the time of day
- High performance, 2000 lumen output, Recessed SS LED square downlights were selected to replace the twin 26W and 42W CFL fittings and maximise the energy savings and controllability within the banqueting suite
- For greater flexibility, DALI (Digital Addressable Lighting Interface) was used in both hotels, allowing the light to be controlled from a central building management system

GAMMA
ILLUMINATION

“We are delighted with the results, Gamma’s stylish luminaires sit harmoniously with the high-end décor whilst the functionality and control features match our requirements and reflect the high standards of the DoubleTree by Hilton.”

Yacine Kerkour, Assistant Maintenance Manager, DoubleTree by Hilton
