

GALLERY & MUSEUM LIGHTING

THE MILLENNIUM GALLERY

CITY CENTRE, SHEFFIELD

GAMMA
ILLUMINATION

PROJECT OVERVIEW

- Both artificial and natural light sources have been utilised to enable the light levels within the museum to flow throughout the building
- The existing energy hungry 75W halogen luminaires were replaced with lingo LED track spotlights
- Powered by Philips SLM with an outstanding optical efficiency of 93%
- The 3000lm option along with a 4000K colour temperature was selected to create a stimulating and bright environment

GAMMA
ILLUMINATION

“The area is significantly brighter and more welcoming, which has led to a number of compliments from our visitors. In addition, we’ve nearly halved the amount of energy each luminaire is consuming, so we’re benefiting from reduced energy bills, its a win win situation all round.”

Nigel Johnson, Millennium Gallery, Sheffield
