# The Broadway

Bradford

Gamma is proud to have been involved in the high profile Broadway shopping centre project, working in partnership with Edmundson Electrical Ltd.

Gamma's powerful adjustable Fame framelights were installed in the mall's full height ceilings, selected store facades and interiors as well as in the food court. The framelights were chosen for their high output of 4255 lumens per gimbal and their excellent luminaire efficacy of 120.2 Llm/W, which aided Part L compliance.

High performance Lingo LTS track spotlights were also installed in New Look, Mini Pop Up, Jeff Bains, MenKind and Accent Clothes, whilst functional, yet aesthetically pleasing, Sysion SS square luminaires were fitted in the stairwell and lobbies for ambient lighting.
