**Design and manufacture**

Gamma Illumination is a UK designer and manufacturer of low energy lighting solutions. Our team of passionate designers and engineers draws inspiration from the latest technologies, materials and trends.

The manufacturing team pays particular attention to detail and quality in order to meet our high standards of excellence. Deeply rooted in Gamma's ethos is the fusion of great quality and good value without compromise.

**Flexibility and sustainability**

We understand that one size doesn't fit all and we are able to adapt our standard products or create custom products to suit your specific requirements. Our engineers can offer alternative LED components, integrate unique or emerging technologies, using our in-house laser cutters, 3D printers, milling machines and spray booth to give you exactly what you need.

At Gamma, we have always taken our impact on the environment seriously and we are constantly looking for ways to use materials, components and packaging more efficiently and sustainably. We are WEEE registered and fully compliant and, for many years, we have offered a product repair and upcycle service to our customers.
